We took standard case of twenty four (24) 16.9 oz bottles and each pallet would hold about 54 cases. Per calculations, each pallet would hold 1,296 (16.9oz) bottles. multiply that by 15 pallets and we get 19,440 bottles. The total ounce is 328,536, which equals to 9,716 liters. We tasked staging area to send 10,000 liters of water based on these calculations.</p> <p>11/21/18 0058 RPatel - Per SOC Logistics, water is delivered. Mission closed.</p>
